

## Step-1

We have to find all 3 by 3 orthogonal matrices whose entries are zeros and ones.

$$I = \begin{bmatrix} 1 & 0 & 0 \\ 0 & 1 & 0 \\ 0 & 0 & 1 \end{bmatrix}$$

If we take I

$$I^{-1} = \begin{bmatrix} 1 & 0 & 0 \\ 0 & 1 & 0 \\ 0 & 0 & 1 \end{bmatrix} = I^T$$

Therefore I is an orthogonal matrix.

## Step-2

$$A = \begin{bmatrix} 1 & 0 & 0 \\ 0 & 0 & 1 \\ 0 & 1 & 0 \end{bmatrix}$$

Let

Consider

$$\begin{aligned} AA^T &= \begin{bmatrix} 1 & 0 & 0 \\ 0 & 0 & 1 \\ 0 & 1 & 0 \end{bmatrix} \begin{bmatrix} 1 & 0 & 0 \\ 0 & 0 & 1 \\ 0 & 1 & 0 \end{bmatrix} \\ &= \begin{bmatrix} 1 & 0 & 0 \\ 0 & 1 & 0 \\ 0 & 0 & 1 \end{bmatrix} \\ &= I \end{aligned}$$

## Step-3

Therefore A is invertible and  $A^{-1} = A^T$

Therefore A is an orthogonal matrix.

Hence above 3 by 3 matrices are orthogonal and whose entries are zeros and ones.
